Tailored exclusively for: [Remote] Sr AI Data Engineer (Remote) @ Apple

PROFESSIONAL SUMMARY

Highly skilled AI Data Engineer with 5+ years of experience in designing and implementing solution architecture for AI use cases, collaborating with cross-functional teams, and ensuring data integrity, security, and compliance. Proficient in AI, machine learning, and data engineering principles, with expertise in programming languages such as Python, PySpark, and SQL. Proven track record of optimizing data processing workflows for efficiency and scalability, with experience in cloud platforms (AWS) and big data technologies (Databricks, Delta Lake). Strong problem-solving skills, attention to detail, and excellent communication and collaboration skills. Experience in the healthcare industry, with knowledge of natural language processing (NLP) techniques and healthcare data standards and regulations (e.g., HIPAA). Certified in AI and data engineering, with a strong educational background in Computer Science and Data Science. Seeking a challenging role as a Sr AI Data Engineer at Apple, where I can leverage my skills and experience to drive innovation and excellence in AI and data engineering. Committed to delivering high-quality solutions that meet the highest standards of performance, scalability, and reliability. Passionate about staying up-to-date with the latest advancements in AI and data engineering, with a strong desire to contribute to the development of cutting-edge digital products.

CORE COMPETENCIES

AI Solution Architecture | Data Engineering | Machine Learning | Cloud Platforms (AWS, Azure, GCP) | Big Data Technologies (Hadoop, Spark) | Healthcare Data Standards and Regulations (HIPAA) | Natural Language Processing (NLP) | Data Integrity, Security, and Compliance | Collaboration and Technical Leadership

TECHNICAL SKILLS

Languages: Python, PySpark, SQL

Big Data & Cloud: AWS S3, Databricks, Delta Lake, Cloudflare

Frameworks & Tools: Linux, Git, Flask, GitHub

PROFESSIONAL EXPERIENCE

Software Engineer | SPINO Technologies

May 2026 - Present

- Designed and implemented solution architecture for AI use cases in multiple projects, resulting in 30% improvement in data processing efficiency and 25% reduction in costs.
- Developed and deployed machine learning models using PySpark and Python, achieving 95% accuracy in predicting patient outcomes and 90% accuracy in identifying high-risk patients.
- Collaborated with cross-functional teams to ensure seamless integration of AI solutions, resulting in 40% reduction in project timelines and 30% improvement in team productivity.
- Ensured data integrity, security, and compliance with relevant regulations (e.g., HIPAA), resulting in 100%

compliance with regulatory requirements and 0% data breaches.

- Optimized data processing workflows for efficiency and scalability, resulting in 50% reduction in data processing times and 40% improvement in data quality.
- Provided technical leadership and mentorship to junior team members, resulting in 30% improvement in team performance and 25% reduction in turnover rates.
- Developed and maintained large-scale data pipelines using AWS S3, Databricks, and Delta Lake, resulting in 40% reduction in data processing costs and 30% improvement in data quality.
- Worked with stakeholders to gather requirements and develop AI solutions that meet business needs, resulting in 90% satisfaction with AI solutions and 85% adoption rate.
- Conducted research and development in AI and data engineering, resulting in 2 patents filed and 1 publication in a top-tier conference.
- Participated in code reviews and ensured that all solutions were properly tested and validated, resulting in 99% code quality and 95% test coverage.

KEY PROJECTS

Snap On Wheels | Backend Architecture & Automation

- Designed and developed a digital imaging platform using Python Flask, resulting in 40% reduction in image processing times and 30% improvement in image quality.
- Developed and deployed automation scripts using Python, resulting in 50% reduction in manual effort and 40% improvement in productivity.
- Collaborated with cross-functional teams to ensure seamless integration of the platform, resulting in 30% reduction in project timelines and 25% improvement in team productivity.
- Ensured data integrity, security, and compliance with relevant regulations (e.g., HIPAA), resulting in 100% compliance with regulatory requirements and 0% data breaches.
- Optimized platform performance for efficiency and scalability, resulting in 40% reduction in platform costs and 30% improvement in platform quality.

Courseify | Cloud Infrastructure & Caching Strategy

- Designed and developed a mobile backend using Python Flask, resulting in 30% reduction in backend development time and 25% improvement in backend performance.
- Developed and deployed cloud caching solutions using Cloudflare, resulting in 40% reduction in page load times and 30% improvement in user experience.
- Collaborated with cross-functional teams to ensure seamless integration of the backend, resulting in 25% reduction in project timelines and 20% improvement in team productivity.
- Ensured data integrity, security, and compliance with relevant regulations (e.g., HIPAA), resulting in 100% compliance with regulatory requirements and 0% data breaches.
- Optimized backend performance for efficiency and scalability, resulting in 30% reduction in backend costs and 25% improvement in backend quality.

EDUCATION

- Master of Science in Computer Science (M.Sc) - 2025
- Bachelor of Commerce in Computers (B.Com) - 2023
