Tailored exclusively for: [Remote] Sr AI Data Engineer (Remote) @ Apple

PROFESSIONAL SUMMARY

Results-driven AI Data Engineer with a strong background in AI, data engineering, and cloud platforms. Proven experience in designing and implementing solution architecture for AI use cases, collaborating with cross-functional teams, and ensuring data integrity, security, and compliance. Skilled in programming languages such as Python, PySpark, and SQL, with experience in big data technologies like Databricks and Delta Lake. Proficient in cloud platforms including AWS S3 and Cloudflare. Adept at problem-solving, communication, and collaboration, with a strong attention to detail. Passionate about leveraging AI and data engineering to drive business growth and improve healthcare outcomes. Seeking a challenging role as a Sr AI Data Engineer at Apple, where I can utilize my skills and expertise to make a meaningful impact.

CORE COMPETENCIES

AI | Data Engineering | Cloud Platforms | Machine Learning | Natural Language Processing |
Healthcare Data Standards | HIPAA | Data Integrity

TECHNICAL SKILLS

Languages: Python, PySpark, SQL

Big Data & Cloud: Databricks, Delta Lake, AWS S3, Cloudflare

Frameworks & Tools: Linux, Git

PROFESSIONAL EXPERIENCE

Software Engineer | SPINO Technologies

May 2026 - Present

- Designed and implemented data pipelines using PySpark and Databricks, ensuring seamless data processing and integration with various data sources.
- Collaborated with cross-functional teams to develop and deploy AI-powered solutions, resulting in improved business outcomes and enhanced customer experiences.
- Developed and maintained large-scale data warehouses using Delta Lake, ensuring data integrity, security, and compliance with relevant regulations.
- Utilized AWS S3 and Cloudflare to design and implement scalable and secure data storage solutions, resulting in improved data availability and reduced costs.
- Provided technical leadership and mentorship to junior team members, helping them develop their skills and expertise in AI and data engineering.
- Worked closely with stakeholders to understand business requirements and develop data-driven solutions that met their needs and exceeded their expectations.

- Developed and implemented data quality checks and validation processes, ensuring high-quality data and reducing errors and discrepancies.
- Participated in code reviews and ensured that all solutions were properly documented and maintained, resulting in improved code quality and reduced technical debt.

KEY PROJECTS

Snap On Wheels | Backend Architecture & Automation

- Developed a digital imaging platform using Python Flask, automating image processing and analysis tasks and improving efficiency by 30%.
- Designed and implemented a data storage solution using AWS S3, ensuring secure and scalable data storage and retrieval.
- Collaborated with the development team to integrate the platform with various data sources, resulting in improved data integration and reduced data silos.
- Developed and implemented data analytics and visualization tools, providing stakeholders with actionable insights and improving business decision-making.

Courseify | Cloud Infrastructure & Caching Strategy

- Developed a mobile backend using Python Flask, providing a scalable and secure API for mobile applications and improving user engagement by 25%.
- Designed and implemented a cloud caching solution using Cloudflare, reducing latency and improving application performance by 40%.
- Collaborated with the development team to integrate the backend with various data sources, resulting in improved data integration and reduced data silos.
- Developed and implemented data analytics and visualization tools, providing stakeholders with actionable insights and improving business decision-making.

EDUCATION

- Master of Science in Computer Science (M.Sc) - 2025
- Bachelor of Commerce in Computers (B.Com) - 2023
