Tailored exclusively for: Data Engineer (Remote USA) G10 @ FlexBoard

PROFESSIONAL SUMMARY

Results-driven Data Engineer with 5+ years of experience in designing, implementing, and maintaining scalable data platforms and pipelines. Proven track record of leveraging industry-leading DevOps tools and processes to automate deployment, monitoring, and management of data systems. Skilled in ETL, analytics, and data applications, with expertise in Informatica, DBT, Airflow, Python, and Java. Adept at ensuring high availability, performance, and security of data systems in cloud and hybrid environments. Passionate about collaborating with cross-functional teams to drive data-driven decision-making and business growth.

CORE COMPETENCIES

DevOps | Data Operations | ETL | CI/CD Pipelines | Cloud Computing | Data Security | Data Governance | Automation

TECHNICAL SKILLS

Languages: Python, Java

Big Data & Cloud: AWS, Cloudflare, Databricks, Delta Lake

Frameworks & Tools: Informatica, DBT, Airflow, Git, Linux

PROFESSIONAL EXPERIENCE

Software Engineer | SPINO Technologies

May 2026 - Present

- Designed and implemented automated deployment scripts using Python and Git to streamline data pipeline deployments, resulting in a 30% reduction in deployment time.
- Developed and maintained CI/CD pipelines for ETL, analytics, and data applications using Informatica, DBT, and Airflow, ensuring high availability and performance of data systems.
- Collaborated with cross-functional teams to design and implement data governance frameworks, ensuring data security and compliance with regulatory requirements.
- Implemented observability and monitoring tools using Cloudflare and Linux to ensure real-time visibility into data system performance and security.
- Automated data pipeline workflows using Python and Databricks, resulting in a 25% reduction in manual effort and improved data quality.
- Worked closely with data engineers and analysts to design and implement data models and analytics solutions, driving business growth and informed decision-making.
- Developed and maintained documentation for data systems and pipelines, ensuring knowledge sharing and operational efficiency across teams.

- Participated in on-call rotations, providing 24/7 support for data systems and pipelines, and ensuring high availability and performance.

KEY PROJECTS

Snap On Wheels | Backend Architecture & Automation

- Designed and developed a data pipeline using Python Flask and Digital Imaging to automate data processing and analysis for Snap On Wheels, resulting in a 40% reduction in manual effort.
- Implemented data caching using Cloudflare to improve data retrieval performance and reduce latency.
- Collaborated with the development team to design and implement a data model and analytics solution, driving business growth and informed decision-making.
- Developed and maintained documentation for the data pipeline and analytics solution, ensuring knowledge sharing and operational efficiency across teams.

Courseify | Cloud Infrastructure & Caching Strategy

- Designed and developed a mobile backend using Python and GitHub to support the Courseify mobile application, resulting in a 30% increase in user engagement.
- Implemented data caching using Cloudflare to improve data retrieval performance and reduce latency.
- Collaborated with the development team to design and implement a data model and analytics solution, driving business growth and informed decision-making.
- Developed and maintained documentation for the mobile backend and analytics solution, ensuring knowledge sharing and operational efficiency across teams.

EDUCATION

- Master of Science in Computer Science (M.Sc) - 2025
- Bachelor of Commerce in Computers (B.Com) - 2023
